OrionAV

OrionAV is a Desktop/Wall-Mount touch screen LCD monitor that enables operation and control of any computer application with a simple touch. Resistive technology allows activation with a touch of a finger, gloved hand, or any stylus. OrionAV is VESA compatible and may be mounted on a wall, placed on a table, a shelf or a stand.

Offered in wide screen (16:9) and standard (4:3) formats, OrionAV ranges in sizes from 15" to 52" diagonal. Touch screen communicates via USB or Serial and is compatible with Pioneer DVD-V8000, Boeckeler Pointmaker, Crestron and AMX. OrionAV is also available with either a Mac mini or mini PC attached.

EclipseAV

EclipseAV is a touch screen LCD monitor specifically designed for low-profile, flush-mount applications; it extends less than 0.25" when installed. This low-profile feature makes EclipseAV the ultimate solution for integration into walls, cabinets, desks and tables. The bezel may be customized to become fully integrated with the surrounding environment. EclipseAV is also available in 19" rackmount configuration from 6.4" to 19".

Offered in wide screen (16:9) and standard (4:3) formats, EclipseAV ranges in sizes from 6.4" to 52" diagonal. Touch screen communicates via USB or Serial and is compatible with Pioneer DVD-V8000, Boeckeler Pointmaker, Crestron and AMX. EclipseAV is also available with either a Mac mini or mini PC attached.

SolaAV

SolaAV is an open-frame rear-mount touch screen LCD monitor designed to provide AV professionals freedom to create custom touch systems from the ground up. Ideal for a variety of custom applications, SolaAV is the perfect solution when housing or cabinetry does not offer ample space for conventional touch screen LCD integrations.

Offered in wide screen (16:9) and standard (4:3) formats, SolaAV ranges in sizes from 6.4" to 52" diagonal. Touch screen communicates via USB or Serial and is compatible with Pioneer DVD-V8000, Boeckeler Pointmaker, Crestron and AMX. SolaAV is also available with either a Mac mini or mini PC attached.
