

Why Choose CyberTouch | AV?

- **Experience.** Since 1982, CyberTouch | AV has developed custom touch screens and touch screen monitors for Medical, Military, Aerospace and other harsh-environment industries.
- **Availability.** Most 6.4" to 65" integrated displays are IN STOCK. CyberTouch | AV offers same-day price quotes.
- **Range of Products.** No other touch company offers the breadth of product range as CyberTouch | AV. Offering a variety of form factors including open-frame, panel-mount and desktop - from 6.4" to 103" with USB and Serial communication.
- **Industry Alliances.** Our AV products are compatible with the Industry's premier control and annotation systems – Crestron, AMX, Extron, and Boeckeler Pointmaker.
- **US Manufacturer.** CyberTouch | AV is based in Newbury Park, California. Our products are GSA compliant. We also offer Project Registration.
- **Support.** CyberTouch | AV's on-site software, hardware and engineering departments are just a phone call or e-mail away. Sales and distribution throughout the United States.
- **Technology.** CyberTouch | AV's resistive touch screens can be used with a fingernail, gloved hand or any stylus. The fully integrated touch screen aesthetically maintains the integrity of the LCD monitor.
- **Warranty.** Our 3-Year advance-replacement warranty is the best available warranty in the industry.
- **Added-Value.** We are the leader of provided add-value services to our product line, including:
 - Safety or tempered glass for durability and reliability
 - Custom capabilities such as video walls, tables, kiosks, & more

Applications for Touch Screen Monitors

Touch Screens are an ideal solution for all AV vertical markets, including; Way-Finding, Interactive Digital Signage, Corporate, Education, Hospitality, POS, Retail, Government Facilities.

WAY-FINDING

**New York City Visitor's Center
New York, New York**

The Challenge: Create interactive portrait-mode open-frame touch screen monitors with anti-glare protective layer.

The Solution: CyberTouch 32" 1080p HD touch screen monitors. Open-frame allows custom installation into walls with customized mounts and bezels. Anti-glare coating makes viewing of monitor effortless in any lighting.

EDUCATION

**California State University, Northridge
Northridge, CA**

The Challenge: Create ADA compatible interactive way-finding experience in an outdoor environment.

The Solution: CyberTouch 42" single-touch resistive touch screen monitor. ADA compliant monitor was outfitted with custom bezel to allow room for Braille. Custom environmental gasket and custom back box with cooling and heating mechanism included.

EDUCATION

**University of Central Florida, Anatomy Lab
Orlando, Florida**

The Challenge: Create an interactive touch screen that would withstand fluid and other sorts of materials that can be hostile to technology. On-board computer needed as well.

The Solution: CyberTouch 32" with Mac Mini attached. Super-sensitive single-touch resistive touch screen monitors that can detect students' soiled gloved touches in spite of the industrial-grade.

ENTERTAINMENT/AMUSEMENT PARKS

**Branson Landing
Branson, Missouri**

The Challenge: Create an interactive kiosk that would control a larger monitor on the wall.

The Solution: CyberTouch Eclipse 19" wide screen panel-mount LCD touch monitor. Customer can view map of amusement park, buy tickets, view videos of the park's attractions and see show times.
