

The Buckley School

Where: The Buckley School, 3900 Stansbury Ave, Sherman Oaks, CA 91423

What: CyberTouch Invidia Multi-Touch Wall - Invidia 3x1 55 Landscape

CyberTouch was approached by the elite Buckley school for a multi-touch, multi-user video wall for its student Technology Center. The challenge the school was running into was that no touch manufacturer actually, designs, manufactures, and installs this custom application within the project's time frame of 3 weeks. CyberTouch engineered, designed and manufactured the Invidia 3x1 interactive video wall for the school. The video wall is made up of 3- 55" narrow bezel monitors mounted to the wall utilizing a specialized CyberTouch mount. The video wall allows students to interact with one another using games as well as surfing the internet, with up to 40 inputs simultaneously. The interactive wall was designed with a custom bezel as well as vandal-resistant glass for added protection.
