

Draper Laboratory

Where: 555 Technology Square, Cambridge, MA 02139

What: CyberTouch PCAP Touch Engine- Moto 3x2 46" Landscape

In the 1930's Draper Laboratory opened its doors for the first time, quickly becoming the leader in navigation and control technology. Fast forward to 2017 and the Draper Laboratory headquarters in Cambridge, Massachusetts features a new kind of leading technology, a CyberTouch Terra Touch Table. CyberTouch line of Terra Touch Tables table consist of industrial-grade LED-backlit LCD monitors in landscape orientation, designed to operate horizontally with custom internal cooling systems. This custom CyberTouch Terra Touch Table was constructed using six 46" 1080p commercial -grade displays in a 3 x 2 (x,y) landscape orientation, designed with a custom internal cooling system to assure proper functioning once the monitors are placed horizontally. This table is 11' feet in length with one monolithic piece of safety glass, and sunlight-friendly infrared sensors allowing for seamless multi-user interactivity at any time of day- all supported by custom software provided by a third party. CyberTouch also provided the client with supporting computer, video card and processing system to allow for heavy-content software.
